

REACTIVE SKIN DECONTAMINATION LOTION (RSDL)

DESCRIPTION

The Reactive Skin Decontamination Lotion (RSDL) is a Joint Program consisting of decontaminant(s) and applicator(s) required to immediately reduce morbidity and mortality resulting from Chemical, Biological, Radiological, and Nuclear (CBRN) contamination of the skin. The RSDL will augment the currently fielded M291 Skin Decontaminating Kit (SDK) through attrition. There is also a RSDL Training (RSDL-T) packet that will be used for training.

PROGRAM STATUS

RSDL received a Milestone C Full Rate Production approval in March 2007. Marine Corps fielding will not commence until fiscal year 2008 based on receipt of the COE from Marine Corps Combat Development Command.

Procurement Profile:	FY2008	FY2009
Quantity:		
Training Pouches	2,880	1,440
Active Pouches	0	30,240

Developer/Manufacturer:  
EZM, Lake Success, NY

OPERATIONAL IMPACT

RSDL is a medical item that will be employed by individual warfighters to immediately reduce morbidity and mortality resulting from CBRN contamination on skin. The primary purpose of RSDL will be to provide improved skin decontamination capabilities over those currently provided by the M291 SDK.
